IRONBANK RESERVE

INTRODUCTION

“Iron Bank Reserve” is a community driven project on “Binance Smart Chain” functioning as a decentralized bank and venture capital. Traditional banking function is collecting deposits by promising low interest rates from the public and use those deposits to lend with higher interest rates. The purpose of lending is to develop different sectors (agriculture, technology, industries, trade and commerce).

Venture capital is a form of private equity (PE) which finances startup companies or projects. VC is often provided to startups with potential to grow exponentially or companies that have grown quickly and in need of additional capital for expansion. There are different stages for VC investments,

- 1) Pre-seed
- 2) Seed-fund
- 3) Early stage funding
 - Pre-seed is when an idea is turned into a business plan seeking early fund and mentorship.
 - Seed-funding is needed when a business is ready to launch their first product but lacking revenue to fund their operations
 - Early stage funding is required when a business is looking for additional capital for expansion of their growing business

Above mentioned are the key features of traditional banking and VCs.

IRONBANK RESERVE

Purpose of IBR is to help grow startups to their maximum potential reach and support IBR community by distributing profit shares from invested projects. IBR can replace traditional centralized banks and VCs with community support and blockchain technology. To add, IBR will be involved in many products from different sectors which includes daily use products for public. Community will be receiving \$Cake rewards as passive income for holding IBR tokens as an additional bonus and \$Cake rewards are distributed among holders from transaction taxes.

PROJECT FEATURES

IBR will be having features similar to traditional banks/VCs (refer introduction page) but functioning in a different way.

- 1) Pre-seed
- 2) Seed-fund
- 3) Early stage funding

IBR will collect marketing/development taxes (8%) pooled (BNB) into M/D wallet and use those funds to perform above stated functions after the conversion of BNBs to required fiat currency. All projects applying for VC funds will need to submit a detailed project report and these applications with project reports will undergo thorough scrutiny by personalities with financial/economic educational background.

IBR will setup a firm registered under government laws in a blockchain welcomed country (Dubai, Turkey etc). Once the firm is setup, IBR will start accepting applications and business proposals with detailed

project reports. After verification of project reports, a list of approved projects will be made and submitted to community voting for VC funding selection. Once a project is selected, IBR will create contract/partnership deed and start further processes for funding operations.

MISSION AND VISION

IBR mission is to help startup projects with potential to grow exponentially and vision is to become a global venture capital company with the help of blockchain technology.

TOKENOMICS

Token features and tax breakdown:

Total supply: 100,000,000,000

Launch supply: 80,000,000,000

Reserve: 20,000,000,000

Total tax: 15% buy/sell

LP: 3%

Reflection: 2% [\$CAKE rewards]

Burn: 2%

Marketing/Development: 8%

IRONBANK RESERVE

MARKETING

Marketing is necessary for a new project in any sector. IBR intends to prioritize YouTube marketing, because, new investors or researchers need to understand IBR project and we believe visual explanation is much more effective than other mediums. Prioritizing YouTube doesn't mean IBR will ignore other platforms, will do marketing in almost all social medias, news outlets, blogs and if necessary, marketing agencies will be hired.

ROADMAP

Q4 2022 to Q1 2023:

- 1) IBR project and token launch on BSC (Binance Smart Chain)
- 2) Community development
- 3) Whitepaper
- 4) Website launch
- 5) Marketing
- 6) Project Audit

Q2 2023 to Q4 2023:

- 1) Setting up IBR firm under government regulations
- 2) Accepting applications for VC funding
- 3) First startup project selection
- 4) Marketing and promotions
- 5) First startup project launch

SUMMARY

IBR is solely dependent on community support and intends to be fully transparent with every decision. Every step we take is a step towards freedom from centralized banks, institutions and venture capital companies. Each projects we select and launch will support IBR community financially, as long as community support is received. "IRONBANK RESERVE" will stay open to suggestions from community and hope to create an ecosystem of businesses.
